 Machinery and Equipment	 Manufacturing (Various Types)	 Metals and Mining (Basic, Fabricated, and Other Metal Products)	 Non-Metallic Mineral Products	 Regulatory Compliance and Security
 Occupational Health and Safety	 Pharmaceuticals, Cosmetics, and Personal Care	 Healthcare and Medical Devices	 Publishing and Printing	 Regulatory Compliance and Security

BENEFITS OF ISO CERTIFICATION WITH GTICS

By choosing us as your preferred ISO certification partner, you benefit from:

Expert Guidance

Our experienced team of auditors guide you through every step, ensuring a smooth certification process tailored to your business.

Credibility and Trust

Certification from an established and recognised certification body assures customers, suppliers, and partners that your organisation meets the requirements of international standards, enhancing credibility and trust.

Improved Compliance and Quality

GTICS follows stringent guidelines and ensures thorough audits, which assist organisations in meeting industry standards, improving product and service quality.

Global Recognition

GTICS operates in multiple geographical regions and certifies organisations to an international standard, which can facilitate entry into global markets and show compliance with international regulations.

Competitive Advantage

Certification through GTICS can differentiate your business from competitors, as it reflects a commitment to conforming to an international standard.

Risk Mitigation

Certified processes reduce risks and your insurance by ensuring standards are consistently met, minimising the chance of costly errors, product recalls, or compliance issues.

Operational Efficiency

The auditing process can identify opportunities for improvement, leading to greater operational efficiency and cost savings over time.

Customer and Supplier Confidence

Certification reassures both customers and suppliers about your business' ability to deliver quality or services. It establishes and maintains strong relationships with suppliers, customers, and business partners.

Differentiation in Tendering and Bidding

Many tenders, bids, and contracts require a certain level of conformance with industry standards. We audit you against an international requirement standard to assess how well your organisation has met the requirements of the standard and grants you a certificate upon meeting all the requirements which increases your chances of winning competitive bids.

Sustainable Growth

ISO standards encourage organisations to take a process approach which helps streamline and optimise your processes. This leads to reduced waste, and improves resource management, making your operations more sustainable and cost-effective.

KEY ISO CERTIFICATIONS AND THEIR BENEFITS FOR YOUR BUSINESS

	<p>ISO 9001:2015 Quality Management System</p> <p>ISO 9001 certification helps you deliver high-quality goods and services consistently, meeting customer expectations and building trust. It enhances operational efficiency, reduces errors, and promotes continuous improvement, which drives competitiveness and sustainable business growth. This standard supports SDG 9b (Industry, Innovation, and Infrastructure) and SDG 8 (Decent Work and Economic Growth)</p>
	<p>ISO 14001:2015 Environmental Management System</p> <p>ISO 14001 certification empowers your organisation to reduce its environmental impact, minimise waste, and utilise resources more efficiently. This results in lower operating costs, a smaller carbon footprint, and an enhanced corporate reputation as a responsible business. This standard supports SDG 13 (Climate Action), SDG 12 (Responsible Consumption and Production), SDG 14 (Life Below Water), and SDG 15 (Life on Land)</p>
	<p>ISO 45001:2018 Occupational Health and Safety Management System</p> <p>ISO 45001 certification ensures that your workplace is safe, healthy, and productive. This reduces risks and accidents, lowers insurance premiums, and creates a motivated workforce, contributing to a positive organisational culture and a reputation for prioritising employee well-being. This standard supports SDG 3 (Good Health and Well-being) and SDG 8 (Decent Work and Economic Growth)</p>
	<p>ISO 50001:2018 Energy Management System</p> <p>ISO 50001 certification optimises energy use within your organisation, lowering energy costs and reducing greenhouse gas emissions. This aligns your business with global climate goals, enhances energy efficiency, and shows customers your commitment to sustainability. This standard supports SDG 7 (Affordable and Clean Energy) and SDG 13 (Climate Action)</p>
	<p>ISO 27001:2022 Information Security, Cybersecurity and Privacy Management System</p> <p>ISO 27001 supports the resilience of digital infrastructure by assisting organisations in managing and protecting information assets, reducing vulnerability to cyberattacks and data breaches. This standard supports SDG 9 (Industry, Innovation and Infrastructure).</p>
	<p>ISO 22000:2018 Food Safety Management System</p> <p>ISO 22000 certification, which focuses on food safety management, aligns closely with UN SDG 2, 3, and 6. This SDG aims to end hunger, achieve food security and improved nutrition, and promote sustainable agriculture. This standard also supports SDG 2 (Zero Hunger), SDG 3 (Good Health & Wellbeing), and SDG 6 (Clean Water and Sanitation).</p>

Partner with GTICS Today for a Sustainable Future

GTICS is dedicated to assisting organisations in their efforts to contribute to a more responsible and sustainable environment. Contact us today to learn more about our ISO certification services and how we can assist your organisation in making a positive impact while achieving its business goals.

Achieve Sustainable Growth with ISO Certification at GTICS

At GTICS, we believe in building a sustainable, prosperous future by supporting organizations in achieving the highest standards in quality, environmental responsibility, and social accountability. As an ISO certification body, we audit different business processes across industries against an ISO requirement standard that also aligns with the UN SDGs, contributing to a healthier planet, safer workplaces, and a fairer society.

ISO
Certified

WHAT IS THE PROCESS OF CERTIFICATION?

1

Choose the Right Standard

The organization selects the appropriate ISO standard based on its goals and industry. For example, ISO 9001 is for Quality Management, while ISO 14001 is for Environmental Management, and ISO 45001 is for Occupational Health and Safety. Aligning with the standard ensures that the organization follows internationally recognized best practices for that management area.

2

Prepare for Certification

To ascertain the necessary actions, the organization evaluates the standard's specifications. Senior management commits to implementing the standard, setting objectives, and assigning roles for effective implementation.

3

Develop and Implement the Management System

Document processes, procedures, and policies are in line with the requirements of the chosen ISO standard. This may include quality control processes, environmental impact assessments, and health and safety protocols. Implement the management system across the organization, ensuring all employees understand and follow it.

4

Conduct Internal Audits & Management Review

Regular internal audits are conducted to check conformance with the standard. Internal audits assist in identifying any non-conformities or areas for improvement. The organization takes corrective actions for any issues found during internal audits to ensure continuous improvement. Complete a management review of the management system.

5

Apply for Certification

Your inquiry will be received by the team at GTICS. Our sales team will be in touch with you and will guide you in completing the application form. The proposal will be prepared and provided to you based on the information received on the application form. A signed contract will then be required to initiate the certification process.

6

Stage 1 Audit

A date will be scheduled and later confirmed to conduct the stage 1 audit. GTICS conducts a preliminary review of the organization's documentation and readiness for certification. This review identifies gaps that are required to be addressed before the final certification audit.

7

Stage 2 Audit (Certification Audit)

The certification body conducts a full, on-site audit to verify conformance with the standard. Auditors review records, interview employees, and observe practices to ensure the management system is implemented effectively. If there are any non-conformities, the organization is provided with sufficient time to correct them before the certification is granted.

8

Certification Decision

If the organisation meets all requirements, the certification body awards the ISO certificate. The certificate is usually valid for three years, subject to regular surveillance audits.

9

Surveillance Audits

During the three-year certification period, GTICS conducts periodic surveillance audits to verify ongoing conformance.

10

Recertification

After three years, the organisation undergoes a recertification audit to renew its ISO certification. This process is similar to the initial certification but may be streamlined if the organisation has shown consistent conformance.
